BIO

F-WORD is a skilled Breakbeat artist and a well known figure in electronic music. His early musical influences were shaped by the energetic styles of Hardcore and Jungle. Over time, he turned to the roots of music, focusing on Funk, underground Hip-Hop, and IDM. This shift reflects his commitment to diversity and a deep understanding of musical contexts.

F-WORD began producing his own music and discovered his passion for Breakbeat. This genre became his main platform for experimentation and personal expression. Later he became deeply involved in DJing, treating complex mixes as a standalone form of art.

F-WORD founded the Garage and Bass party series **SUB** and has also been involved twice in organizing the **Outlook Festival** in Phuket.
Beyond his solo work, he collaborates with bands as a producer. His DJ sets are known for deep selection of fresh material and fast, technical mixing, combining dancefloor energy with a sense of musical journey. His tracks and remixes are heard worldwide — in clubs, on radio, and through sound systems across the electronic music scene.
